STATINTL

MEMORANDUM FOR:

SUBJECT : Creation of EKG and Spirographic  
Magnetic Tapes

In accordance with your request for additional magnetic tapes, on 22 July 1975 three EKG/Spirographic magnetic tapes were created for processing by OJCS using the new laboratory procedures and the headquarters Beckman equipment. The contents of the tapes are as follows:

1. Tape K
  - a. CO Lead with temperature, barometric pressure and the exam date
  - b. One EKG (medication digit = 1, BP = 2)
  - c. Second EKG (medication digit = 4, BP = 3)
2. Tape L
  - a. Two lead 13 calibration signals
  - b. One EKG followed by 4 spirographic trials -- the last being a straight line (medication = 5, BP = 1)
  - c. CO lead with temperature and barometric pressure change run twice
  - d. Second EKG followed by 3 Spirographic trials (medication = 6, BP = 4)

**SUBJECT: Creation of EKG and Spirographic Magnetic Tapes**

**3. Tape M**

- a. Two lead 13 calibration signals
- b. Spirogram (medication = 7, BP = 2)
- c. Second Spirogram (medication = 8, BP = 5)
